

DUNEPACK series D25

Cadence : 1200 bread/hours with only one operator

Packaging and labeling in the same time

Label printed directly on your packaging, from a synchronized touch screen with your computer system

100% time savings

no more manual labeling – branding is done directly on the packaging by the machine

100% free of additional labels

branding by heat transfer, a very economical system

100% presentation quality

branding is always well placed, no more off-center labels

New soft ergonomic

reduce RSI (repetitive strain injury)

Saving money

Increase ROI (return on investment)

4 supports rolls

Enhance the presentation of your bread with clear window paper bag packaging

All Dunepack machines use paper packaging with perforated clear windows of different colors and coil machine widths with the possibility of personalizing your printing using up to three colors

Machine D25

Touch screen to control printing labels

Printing labels on **the back of the module**.
Movement of the print head by a pneumatic cylinder, **perfectly adjusting** the location of the tag.

Specifications	Machine D25
Speed	1200 bread/hours
Width rolls	From 130 to 320 mm
Diameter rolls	255mm
Voltage	TRI 380v+terre+neutre / 50 Hz
Electric power	1350 W
Number of rolls	4
Closure	1
Weight	520 Kg
Compressor	Integrated
Size	L : 1447 mm / W : 1282 mm

Printing by thermic transfer

Specifications:

Printing surface: 55mm X 90 mm
Printing speed : 250mm/sec
Tape length : 450m

Efficiency :

Quick modification of texts and formats.

Different levels of access protection for the user.

Connexion with computer system.

Economy :

Film transfer optimization can be programmed.

Significant reduction in production stoppages.

Registered design – protected by international patent
